

I SUPPORT RM-10811 and keeping a CW required test. The Knowledge and use of Morse Code is what has set Amateur Radio and the Maritime services apart from all other services. I feel that by keeping Morse that we will have a mode of communications that will work when all others fail. Use of the CW sections of the bands should be divided into 3 sections one for those passing 5wpm , 13 wpm, and 20 wpm code tests. The code tests should NOT be mulitly choise but 5 mins of sending with 1 min of solid copy to pass. this will allow those who wish to increase their code speed a goal to work for in obtaining more bandwith by passing a higher speed test.

with best regards

A.W. (Tony) DePrato WA4JQS
